

Accessing Your Facility Management Plan

Staying on top of testing, inspections, due dates, and deadlines is essential for maintaining compliance with the WVDEP UST regulations. The Facility Management Plan provides a comprehensive report based on previously submitted documents, allowing facility owners to easily track what has been received, what is missing, and what the WVDEP expects by specific dates.

To access your Facility management plan”

To access your Facility management plan click on the “My Facility” link and then selecting the facility number.

The facility management plan can be found directly below the facility and owner information. Click on “View by Category” or “View by Schedule”.

Underground Storage Tank Compliance Plan for

RICH OIL # 3948

1052 US HWY 33 F, WESTON, WV 26452

WVDEP Facility ID: 2108749

The compliance activities listed below for your federally regulated underground storage tanks are required by West Virginia Department of Environmental Protection (WVDEP) and federal UST regulations (40 CFR Part 280) are based on the tank registration information that was submitted to WV DEP and/or data recorded by WV DEP at the last on-site inspection. A summary of this information is in the attached chart. Please review this information carefully. Incorrect information may cause this compliance plan to be incorrect as well and it is your responsibility to correct the information by submitting appropriate documents to WVDEP. Incorrect information in this plan does not relieve the tank owner and/or operator for maintaining full compliance with the UST regulations.

Information on the compliance requirements is available in the document Must for USTs and is available at <https://www.epa.gov/ust/musts-usts>. The compliance activities listed below are specific to this facility and should help you plan the work that needs to be completed. In many cases, a WVDEP Certified Worker will be required to perform repairs and testing. Any topic areas in this compliance plan that are in red may indicate a compliance issue and/or insufficient information to provide specific information on what you are required to complete to comply with the regulations. Please contact WVDEP UST Section to provide updated information and an updated compliance plan can be provided to you.

Spill/Overfill

Applies To	Compliance Requirement
	For each delivery, operator or designee must ensure there is enough room in the tank to accept the full delivery and any spills/releases are cleaned up.

Financial Responsibility

Applies To	Compliance Requirement
	You currently have a financial responsibility mechanism that expires on 12/31/2018 (Past Due) . You must renew or obtain another form of financial responsibility by or before 12/31/2018 (Past Due) .
	Your financial responsibility mechanism expired on 12/31/2018 (Past Due) . You must stop operating your UST system until you have obtained a form of financial responsibility in accordance with 40 CFR Part 280 Subpart H. Financial responsibility must be maintained on your UST system until such time as you permanently close the system following WVDEP approved closure procedures.

Operator Training

Applies To	Compliance Requirement
	Properly train Class A and Class B operators within 30 days of assuming duties. Class A and Class B operators must have training performed by a WVDEP approved Operator Training Vendor https://dep.wv.gov/WWE/ee/tanks/ust/Pages/USTOperatorTraining.aspx
