**MEMORANDUM**

To: R30-03900001-2020 (4 of 5) (AA01) file

From: Sarah Barron

Date: August 14, 2023

Subject: Administrative Amendment

The Chemours Company FC, LLC intends to transfer the equipment and control devices associated with the production of Glycolic Acid (Emission Unit IDs: G003 to G028, G031 to G036, and G040) to another company. In preparation for this, the permittee has submitted the application for an administrative amendment to separate the existing Title V operating permit R30-03900001-2020 (4 of 5) into two permits.

R30-03900001-2020 (4 of 5) (AA01) contains the applicable requirements from Sections 3.0. and 4.0. related to the equipment and control devices used in the production of Vazo. Included in these sections are requirements that reference the permits R13-1051 and R13-1399A. The Group (4 of 5) permit will remain with The Chemours Company FC, LLC.

R30-03900001-2020 (4A of 5) (AA01) contains the applicable requirements from Sections 3.0. and 5.0. related to the equipment and control devices used in the production of Glycolic Acid. Included in these sections are requirements that reference the permit R13-1534. The Group (4A of 5) permit will be transferred to a new company at a later date.

Both production processes are also subject to requirements under 45CSR21 per CO-R21-97-31 and the amendment CO-R21-C-2001-10A(97) and under 45CSR27 per CO-R27-91-40A and the amendment CO-R27-92-45A(91).

Conditions 2.1.3., 2.11.4., 2.22.1., 3.5.3., 3.5.4., 3.5.7., 3.5.8.a.1., and 3.5.8.a.2. as well as Section 2.17. of the Title V operating permit boilerplate have also been updated due to revisions to 45CSR30 and changes to the EPA's mailing address.
