MEMORANDUM

To: R30-03900001-2022 (5 of 5) (AA01) file

From: Sarah Barron

Date: August 14, 2023

Subject: Administrative Amendment

The Chemours Company FC, LLC intends to sell the CO Flare (Emission Point: 209.001) and the Drum Filler (Emission Point DPDF). In preparation for this, the permittee submitted the application for an administrative amendment to separate the existing Title V operating permit R30-03900001-2022 (5 of 5) into two permits.

R30-03900001-2022 (5 of 5) (AA01) contains the requirements for the Dimethyl Ether (DME) process of Section 6.0. and the requirements for the Dimethyl Sulfate (DMS) process of Section 7.0. The Group (5 of 5) permit will remain with The Chemours Company FC, LLC.

R30-03900001-2022 (5B of 5) (AA01) contains the requirements for the CO Flare from Section 8.0. The CO Flare is also subject to requirements under R13-0914B. The Group (5B of 5) permit will be transferred to a new company at a later date. The Drum Filler has also been transferred to R30-03900001-2022 (5B of 5) (AA01); however, this unit is not currently subject to any applicable requirements.

Conditions 2.1.3., 3.5.4., 3.5.7., 3.5.8.a.1., and 3.5.8.a.2. as well as Section 2.17. of the Title V operating permit boilerplate have also been updated due to revisions to 45CSR30 which were finalized on March 31, 2023.
