Electronic Submittal of Dam Control Jurisdictional Termination (DCJT)

The Division of Mining and Reclamation is pleased to announce the DCJT as a new submittal type in the Electronic Submission System (eSS).

The DCJT will allow the permittee to upload supporting documentation as required in the Coal Related Dam Safety Rules, 38 CSR 4, to request the abandonment of an impoundment. This will facilitate the release of the Dam Certificate in accordance with these regulations and with the Surface Mining Control and Reclamation Act (SMCRA).

The permittee shall submit one abandonment request per eSS submission. The "Reference ID" will define the year and the impoundment name.
